Project title: List of Feral Children

1. Project overview

The goal of my project is to present the information in a fun and engaging way.

2. Resources

Here is the wikipedia article: https://en.wikipedia.org/wiki/Feral_child. There are also links to more detailed Wikipedia articles on that page with images of some of the children.

3. Audience

People who like the meme that edits the page to include "raised by French " and those who like going down Wikipedia rabbit holes or are knowledgeable in internet culture.

(this one)

4. Message

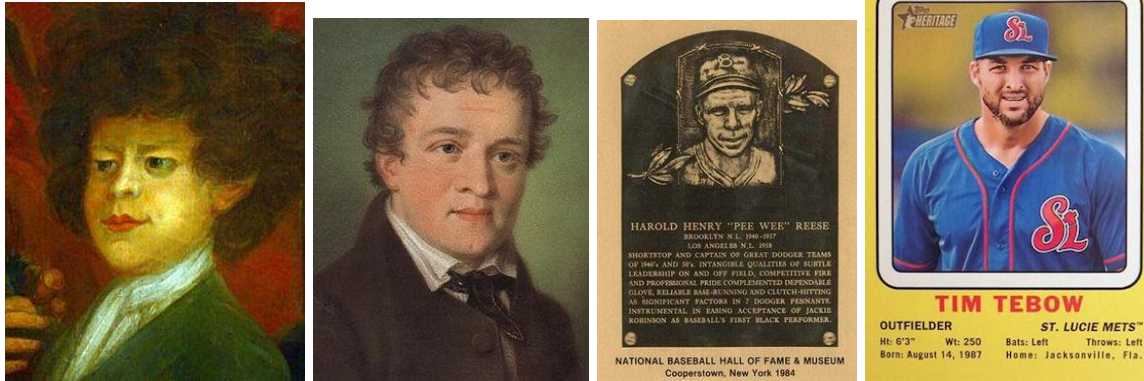

I kinda want each kid to seem to be elevated to celebrity status through the page. I want the website to be both informative and interesting.

5. Tone

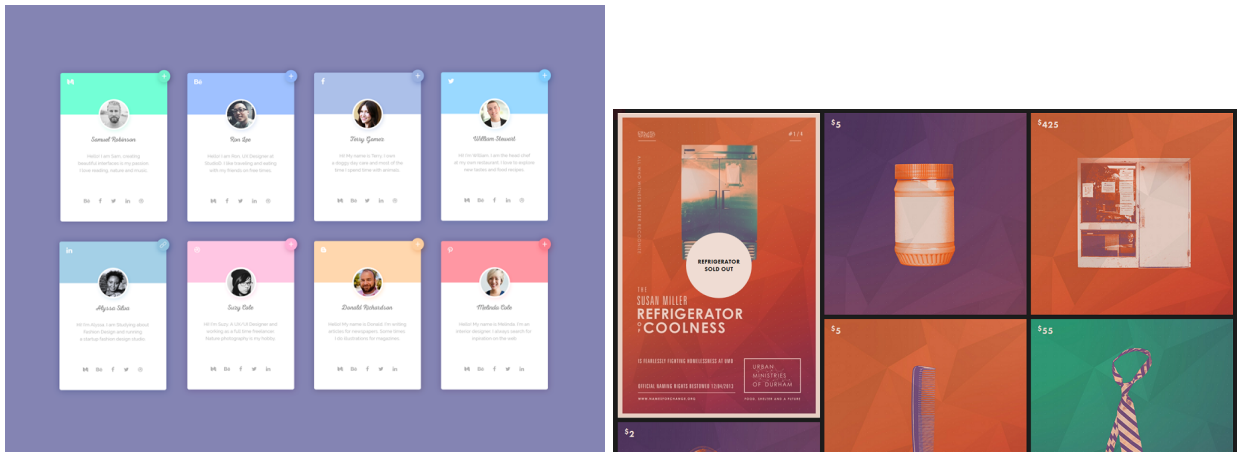

Humorous and fun

6. Visual Style

I'm thinking of making each feral child into an info card somewhat like a baseball card catalog with a background image of the corresponding animal for each section. Would be cool if you could open a bigger picture of the card on the website and flip through them but that would probably require some javascript.

some children and baseball card examples

this kind of page layout (but not this aesthetic/color choice)
